

Know your calculator!

I have a (brand) _____ and it is a (model)

_____. I also have the current OS on it. Y / N

I enter a **LIST** of data by:

I find the **Statistical functions** for my calculator under the following options:

When I lose track of what I am doing, to start over I:

This side left blank

The steps on my calculator to do a “**1 Variable Statistics Calculation**” are:

The output of the “**1-Var Stats**” is following. What do they mean?

\bar{x} is _____

$\sum x$ is _____

$\sum x^2$ is _____

Sx or σ_{n-1} is _____

σ_x or σ is _____

n is _____

Minx is _____

Q1 is _____

Med is _____

Q3 is _____

MaxX is _____

While I was looking at functions, I found **LinReg a+bx** under:

In order to **graph** I need to:

After graphing I should ALWAYS check my **window**. I do that by:

Why do I always need to check my window?

Finally, I need to know where **Distributions** are. I looked for **NormCDF**, **NormPDF** and I found them by:
